RE: Letter of Concern
License No. 2077, Case No. 3006M

Dear Dr. Wilson:

At their meeting on October 25, 2003, the Board of Osteopathic Examiners in Medicine and Surgery conducted an investigative hearing on the above-referenced complaint. That complaint alleged that you violated A.R.S. § 32-1854 (6) in that you did not properly evaluate and a patient presenting to the emergency room, to rule out potential life threatening situation.

Based on the information presented and your discussion with the Board, the Board found there was insufficient evidence to conclude that your conduct constituted unprofessional conduct or to support direct action against your license. However, the Board voted to issue you this advisory **LETTER OF CONCERN**. The Board believed your conduct was of concern in that you did not appear to have recognized, in this instance, the significance of the patient's medical history.

A Letter of Concern is a public document for five years from the date of issuance, and may be cited in future actions against your license. It is not a disciplinary action and is not reported to the National Practitioner Data Base.

Sincerely yours,

Elaine LeTarte
Executive Director
